

Momentum is Named 2019 Silver Edison Award Winner

Prestigious Award Honors Newspace Pioneer in In-space Transportation

April 05, 2019 -- Santa Clara, CA - Momentum (<http://www.momentum.space>), provider of in-space transportation services, has been honored with a [INSERT VALUE] award in the 2019 Edison Awards. The Edison Awards, named after Thomas Alva Edison, recognize and honor the world's best in innovators and innovations.

Based in Santa Clara, California, Momentum (a graduate of the prestigious Y combinator program) provides the safest and most cost effective in-space transportation services available for satellites and spacecraft ranging in size from fist sized microsats to multi-ton GEOs.

Category finalists for the Aerospace Innovation category also included laser communication and electric propulsion innovators, and were judged by more than 3,000 leading business executives including past award winners, academics and leaders in the fields of product development, design, engineering, science and medical.

"We are thrilled that our seasoned technical team is receiving accolades for their work, and that the industry has established us as a leader for in-space transportation services in the burgeoning newspace economy," said Mikhail Kokorich, CEO of Momentum.

About Momentum

Momentum is providing a shuttle service for satellites. Chemical rockets deliver our shuttles loaded with satellites into an initial orbit. Our shuttles, powered by water plasma engines, then transport these satellites the last mile to their target orbits.
